

# THINK OF

Smart IP (Internet Protocol) Cloud technology means remote real-time monitoring and programming of all your buildings anytime, anywhere.

You can protect your precious assets as if you were actually there on-site.

All data, events automatically backed-up in the BATICONNECT® CLOUD\* so no risk\*\*.

But it is the simplicity you will notice first.

Use your own internet enabled devices to log onto **www.baticonnect.com** – so effectively you are at the controls whenever you want.

Share the management of all your buildings with any number of colleagues and set access levels.

See in real-time the status of door controllers so you know if any are offline or malfunctioning and need a service visit.

BATICONNECT<sup>®</sup> CLOUD adds a whole new dimension to your building management passion with intuitive control – no software required.

Wireless and constantly evolving, the BATICONNECT<sup>®</sup> CLOUD regularly updates your buildings with new features. It is future proof.

Enjoy the thrill of this cutting-edge dialogue technology between you and all your buildings.

### **BATICONNECT® CLOUD** is the connectivity of the future.

\* Same concept as your Smart phone being backed up on Apple iCloud or Google Drive, or your Office data stored in Microsoft 365 Cloud.

\*\* Unlike VOIP / VIP licence type non-CLOUD (so static technology) systems which rely on site based servers, controllers or gateways with the real risk of data loss due to user error, equipment failure, theft or vandalism on site, and no remote real-time monitoring.

### www.baticonnect.com

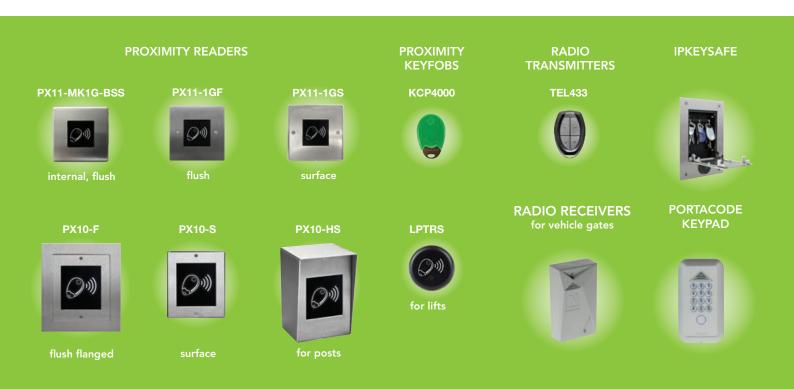

Remote programming and management platform for ANY system configuration, no software required.

## **BATICONNECT® CLOUD for ACCESS CONTROL** Any Quantity, Any Mix.

## **ANTI-CLONE GUARANTEE**

for KCP4000 proximity keys / TEL433 radio transmitters

### The BATICONNECT® CLOUD platform provides:

- 1. Automatic on-going system data back-up.
- 2. Client access 24/7/365 for remote programming of telephone numbers, proximity keyfobs, radio transmitters, keypads, digital displays, trades, and IPKEYSAFE<sup>™</sup> (secure key storage) on all controlled doors and vehicle entrances.
- 3. Audit trail and data retrieval of all system usage.

Remote programming and management platform for ANY system configuration, no software required.

# BATICONNECT® CLOUD for IPGUARD 4G/IP/GSM SMART VISITOR DOOR ENTRY Any Quantity, Any Mix.

IPGUARD SMART VISITOR PANELS 3000 flat capacity

### The BATICONNECT<sup>®</sup> CLOUD platform provides:

- 1. Automatic on-going system data back-up.
- Client access 24/7/365 for remote programming of telephone numbers, proximity keyfobs, radio transmitters, keypads, digital displays, trades, and IPKEYSAFE<sup>™</sup> (secure key storage) on all controlled doors and vehicle entrances.
- 3. Audit trail and data retrieval of all system usage.

Remote programming and management platform for ANY system configuration, no software required.

# BATICONNECT® CLOUD for IPVIEW® Full IP/PoE VIDEO PANEL WITH PROXIMITY READER

**IPVIEW SMART VIDEO DOOR ENTRY** 

**IPVIEW-F** 

**IPVIEW-HS** 

IPVIEW® TOUCH INTERNAL

PROXIMITY READERS AND RADIO RECEIVERS ON SECONDARY DOORS ETC ANY QUANTITY, ANY MIX

The BATICONNECT<sup>®</sup> CLOUD platform provides:

- 1. Automatic on-going system data back-up of access control.
- 2. Client access 24/7/365 for remote programming of proximity keyfobs and radio transmitters.
- 3. Audit trail and data retrieval of all access control system usage.

# TOTAL 24/7/365 REAL-TIME MANAGEMENT OF ALL YOUR SITES

www.baticonnect.com

## **PROGRAM ALL SYSTEMS, PANELS, CREDENTIALS REMOTELY**

- Programming without software via the cloud
- Real-time updates
- Modern and easy; NO programming readers required for proximity keyfobs, radio transmitters. This is only possible because the proximity keyfobs and radio transmitters are each stamped with a unique scheme ID number plus sequential user ID number (the highest level of security and most rigid key control).

## FLEXIBLE MULTI-MANAGER SYSTEM

### **PROGRAMMING AUTHORISATION LEVELS**

Set programming level rights according to requirements for different facilities: Management, Service, Concierge etc

### TRANSFER ACCOUNTS, AMEND WHO CONTROLS WHICH SITES

Management and service companies change. There may be numerous different contractors on a particular site. Ownership and responsibility for blocks / cores on a site are often mixed.

Control and set authorisations as required via BATICONNECT® CLOUD.

SMS / Email notifications of forced doors, faults on 3rd party systems etc.

### COMMUNICATE DIRECTLY WITH RESIDENTS

Use BATICONNECT® to send SMS messages directly to your residents.

**EVENT LOGS** 

## **PROGRAM ACCESS RIGHTS**

Date period validity Example: from 28 Sept to 14 Dec 2022

Time zone validity Example: from 08:00-20:00 Mon-Fri Door / Gate validity Create door/gate authorisation profiles

## KCP4000 Proximity Keyfob for residents

- KCP4000 proximity keys are each **engraved with a unique 10 digit ID number**.
- The first 5no digits **identify the scheme**, the last 5no digits **identify the user**.
- They are also **sequentially numbered** for ease of administration control and security.

TEL433 Coded Radio Transmitter for motorists

- TEL433 radio transmitters are each **engraved with** a unique 10 digit ID number.
- The first 5no digits **identify the scheme**, the last 5no digits **identify the user**.
- They are also **sequentially numbered** for ease of administration control and security.

This is exactly the same numbering ID principle – copied from the mechanical key manufacturers – as used for the highest security level of mechanical keys available on the market.

It is the only ID numbering methodology that completely guarantees 100% accurate future-proof fully traceable control of every proximity key and radio transmitter.
