Important information for Housing Associations & Managing Agents

(1) NACD INSTALLATIONS ARE OPEN PROTOCOL

- (A) Full ownership of the installation and all associated data with full administration rights belongs to the system owner.
- (B) NPH video door entry, IPVIEW Full IP (PoE) Video Entry, IPGUARD® 4G/IP/GSM Smart Visitor Door Entry, and associated EVE196-X3-RS proximity/radio access control systems installed from 2020 are BATICONNECT CLOUD based via **WWW.BATICONNECT.COM** and DO NOT require any programming software. Full remote programming and administration is automatically available to unlimited authorised persons with a PC/Laptop or other device(s) with internet access. The client DOES NOT need to provide any broadband or telephone lines.
- (C) NACD Ltd will program proximity keys, radio transmitters and telephone numbers free of charge, within 18 working hours of request, for 12 months from the date of handover on all BATICONNECT CLOUD systems.
- (D) For non-NACD 3rd party systems, remote access may require the provision on site of broadband services by the builder/client. Obviously, for non-CLOUD based systems, no broadband means that every system change will require a chargeable engineer callout with costs and response times subject to site location and engineer availability.
- (E) NACD Ltd offer in-house and Teams training to the system owner and/or management company so that they can remotely administer and program the NPH video door entry, IPGUARD® 4G/IP/GSM Smart Visitor Door Entry, and associated EVE196-X3-RS proximity/radio access control systems via BATICONNECT CLOUD **WWW.BATICONNECT.COM**. The only requirement is that the client has internet access, NO software is required.

Reset instructions for emergency breakglass unit ref. EMEX-FL

HEALTH & SAFETY! THIS IS NOT A SYSTEM FAULT AND IS ALWAYS A CHARGEABLE CALL-OUT

- 1** This is how the green breakglass should look.

- 2** This is what it looks like if it has been activated.

"The door is not locking, it stays open!"

This is probably because the green emergency breakglass unit has been activated.

This is a device installed for your safety.

When it is activated it always breaks the power to the electric locking so that the 12VDC **fail safe** locking **FAILS** and you can get out of the building safely.

If you can see a **thin yellow band** at the top of the white resettable plate in the middle of the breakglass unit — then you know somebody has activated the unit.

Now you know that the door is **NOT LOCKING** because the emergency exit safety device has been activated !

You need to reset the green breakglass using the special black plastic key — as shown in the pictures.

- 3** To reset, insert the black plastic reset key.

- 4** Leaving the black plastic reset key inserted, use your thumbs to pull down gently about 10mm.

I confirm that I accept full call-out charges (even for door entry and access control systems under maintenance contract cover) if the reason that the door is not locking is related, in any way whatsoever, to the green breakglass unit.

For example, the green breakglass unit has been activated and not reset properly or, has been damaged in any way or, cannot be reset because the black plastic reset key has been lost.

If you would like to purchase a black plastic reset key, please send your order through to: sales@nacd.co.uk

Cost £20.00 + VAT = £24.00

- 5** Now gently remove the black plastic reset key.

- 6** Hold the breakglass as shown and, using medium force, push up with both thumbs simultaneously. You will see the yellow activated band disappear and will hear a click. If the unit now looks like picture no 1, you have correctly reset the breakglass unit. Now check that the door has relocked.

Police Preferred Specification

Secured by Design (SBD) is the official UK police crime prevention initiative that works to improve the security of buildings and their immediate surroundings and to thereby help people live more safely. Secured by Design is the only way for products to achieve police recognition in the UK. In order to achieve Secured by Design status, the IPGUARD 4G/IP/GSM Smart Technology Visitor Panels (PRO, MINI, MINI PLUS, TOUCH), EVE196-X3-RS BATICONNECT.COM proximity reader door controllers, IPVIEW full IP/PoE Video Panels, PX10/PX11 and LPTRS Proximity Readers, PORTACODE Keypads & NPH Video Panels had to adhere to rigorous test standards to meet the Police Preferred Specification. The principles of Secured by Design have been proven to reduce the risk of crime and the fear of crime.

The products listed above have all been tested as a critical component within the British security standard LPS1175-SR2. The product it was tested in is a Premier doorset – BRE/LPCD Certificate No 1097A, dated 28/03/22.
