SECURITY FUNCTION ON

To answer a call from the IPVIEW visitor panel:

1. The video monitor will ring and display picture of your visitor.
2. Press **ACCEPT** on the video monitor and talk to your visitor.
3. Press **UNLOCK** on the video monitor if you want to open the door for the visitor.
4. Then always press **HANG UP**.

If you do not want to let the visitor in just press **HANG UP**.

To enable the button in the Lift for your floor (if applicable):

Do everything as explained above... remember you must always end the call by pressing **HANG UP**.

Now if you press **UNLOCK** on the video monitor the lift floor button will be enabled.

You can enable the Lift Floor Button at any time by pressing the **UNLOCK** button but only when the video monitor is not on a call with the visitor panel.

System configuration
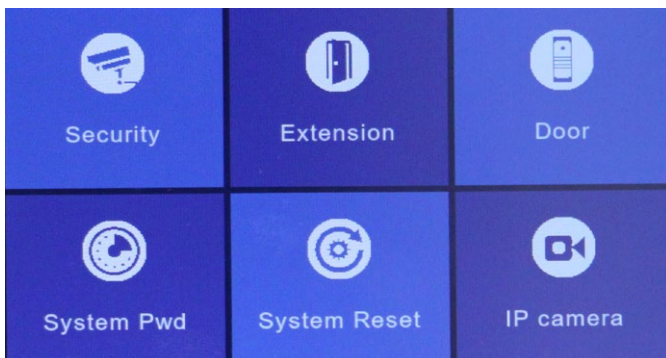

Admin / Maintenance can adjust all parameters and settings required to connect to the IP System.

Monitoring

Panels & IP Cameras – monitoring all Panels and IP Cameras setup to the system from IPVIEW Monitor Interface. Can trigger Unlock function and take real time snapshot saved into the internal or external (MicroSD card)

Security

Security Interface – 8 security zones including Security Zone Location, Arming Type, Arming Status. One click to Arm or Disarm all 8 security zones.

User settings
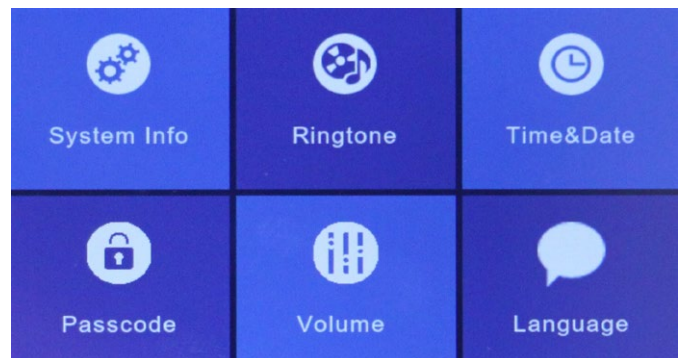

- System Info - details about connection type, functions to manage SD card.
- Ringtone Settings - setup ringtones for the handset.
- Time and Date setup and change display format.
- Passcode Settings - personalize User Access Code.
- Volume Settings - adjust the volume level for Ring and Talk functions.
- Turn On/Off key tone when using touch screen.
- Language Settings - select the preferred Language.
- Screen Brightness - adjust the brightness.
- Wallpaper - user can select preferred wallpaper from SD card.
- Screen Saver - supports 4 types of standby modes: black screensaver, digital time screensaver, clock screensaver and picture screensaver.

Calls and cloud options
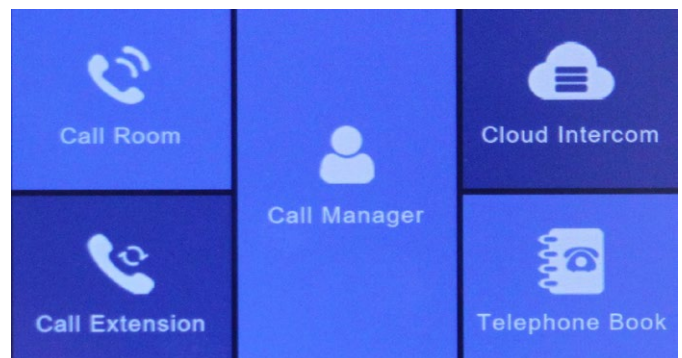

- Call Flat - system can call any other user connected to the block Door Entry System (this option can be enabled or disabled).
- Internal Call - the function supports intercom calls between more than 1 handset setup in the dwelling.
- Cloud Intercom - if Cloud Intercom is setup (see user manual) calling from the door panel will generate a notification to the smart phone. Audio/Video channel will be routed to the phone and indoor monitor. With this option you can have a "family call" as can setup more than 1 device. System will recognize the 1st device answering opens the link and will terminate the call to others. This function requires Wi-Fi connection in the dwelling.

How to connect your Smartphone to IPVIEW (Tuya App)

Select "Video Intercom" from the menu. Select "Wi-Fi Connection" **1** .

Once you have found your Wi-Fi network press Connect and enter your Wi-Fi password.

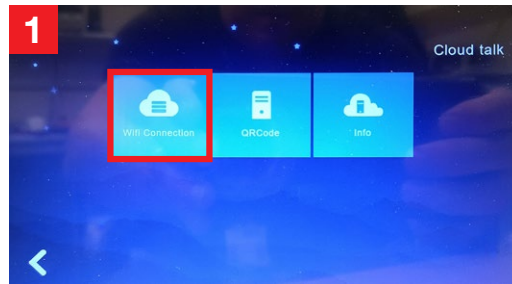

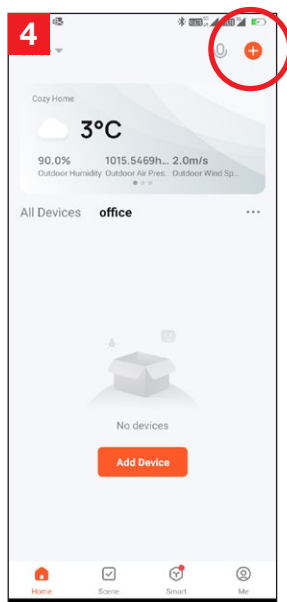

When the Status shows Connected, press back to exit from this option **2** .
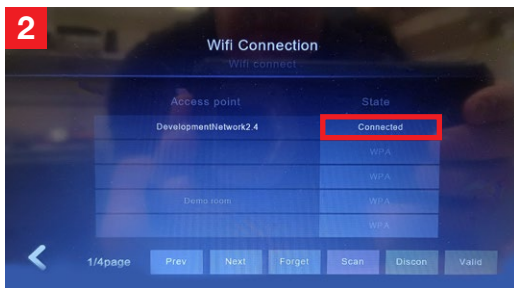

After successful connection, select the option "QRCode". You will see a QR Code ready to be paired with your smartphone **3** .

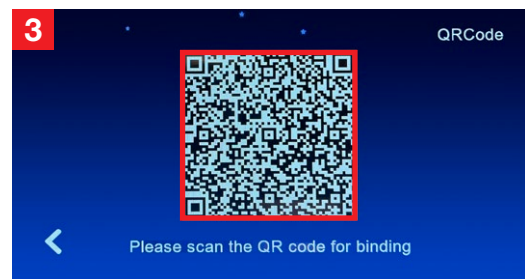

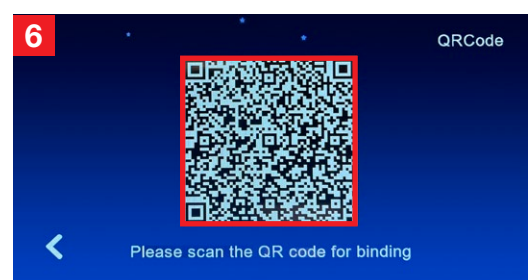

You have to first have a TUYA account activated. Select the "+" in the top right corner **4** .

Then from pop-up menu, select "Scan" **5** .

Point the camera of your smartphone at the QR Code. The system will automatically progress the binding process **6** .
