RESIDENTS

Use your radio transmitter to enter through those vehicle entrance(s) authorised to you. Press the relevant button on the radio transmitter to open the vehicle gate/roller shutter as you drive towards it. Please keep a record of the unique 10 digit number engraved on each of the radio transmitters issued to you.

TEL433 radio transmitters are always part of a unique group of radio transmitters which we refer to as a "Site Code". Each radio transmitter in a particular group (site code) starts with the same first 5no digits followed by 00001, 00002, 00003 and so on. This enables batch programming and deletion and, of course, individual programming and deletion.
