

THINK OF

AS YOUR SAFETY CLOUD.

Smart IP (Internet Protocol) Cloud technology means **remote real-time monitoring and programming of all your buildings anytime, anywhere.**

All data, events automatically backed-up in BATICONNECT® CLOUD* – so no risk**.

Use your own internet enabled devices to log onto **www.baticonnect.com** whenever you want.

Share the management of all your buildings with any number of colleagues and set access levels.

See in real-time the status of door controllers so you know if any are offline or malfunctioning and need a service visit.

BATICONNECT® CLOUD is 24/7/365 remote building management with **no software required.**

Constantly evolving, the BATICONNECT® CLOUD regularly updates your buildings with new features. It is future proof.

BATICONNECT® CLOUD is connectivity into the future.

* Same concept as your Smart phone being backed up on Apple iCloud or Google Drive, or your Office data stored in Microsoft 365 Cloud.

** Unlike VOIP / VIP licence type non-CLOUD (so static technology) systems which rely on site based servers, controllers or gateways with the real risk of data loss due to user error, equipment failure, theft or vandalism on site, and no remote real-time monitoring.

Remote programming and management platform for ANY system configuration, no software required.

BATICONNECT® CLOUD for ACCESS CONTROL

The BATICONNECT® CLOUD platform provides:

1. Automatic on-going system data back-up of access control.
2. Client access 24/7/365 for remote programming of proximity keyfobs and radio transmitters.
3. Audit trail and data retrieval of all access control system usage.

TOTAL 24/7/365 REAL-TIME MANAGEMENT OF ALL YOUR SITES

www.baticonnect.com

PROGRAM ALL SYSTEMS, PANELS, CREDENTIALS REMOTELY

Display names, details

Proximity keyfobs

Keypad codes

Radio transmitters

Keysafes

- Programming without software via the cloud
- Real-time updates
- Modern and easy; NO programming readers required for proximity keyfobs, radio transmitters. This is only possible because the proximity keyfobs and radio transmitters are each stamped with a unique scheme ID number plus sequential user ID number (the highest level of security and most rigid key control).

ALERT NOTIFICATIONS

SMS / Email notifications of forced doors, faults on 3rd party systems etc.

COMMUNICATE DIRECTLY WITH RESIDENTS

Use BATICONNECT® to send SMS messages directly to your residents.

EVENT LOGS

FLEXIBLE MULTI-MANAGER SYSTEM

PROGRAMMING AUTHORISATION LEVELS

Set programming level rights according to requirements for different facilities: Management, Service, Concierge etc

TRANSFER ACCOUNTS, AMEND WHO CONTROLS WHICH SITES

Management and service companies change. There may be numerous different contractors on a particular site. Ownership and responsibility for blocks / cores on a site are often mixed.

Control and set authorisations as required via BATICONNECT® CLOUD.

PROGRAM ACCESS RIGHTS

Date period validity

Example: from 28 Sept to 14 Dec 2024

Time zone validity

Example: from 08:00–20:00 Mon-Fri

Door / Gate validity

Create door/gate authorisation profiles

Secured by Design

Police Preferred Specification

ANTI CLONE GUARANTEE

ANTI-CLONE GUARANTEE

for KCP4V proximity keys / TEL433 or TEL8G radio transmitters

KCP4V Proximity Keyfob for residents

- KCP4V proximity keys are each **engraved with a unique 10 digit ID number**.
- The first 5no digits **identify the scheme**, the last 5no digits **identify the user**.
- They are also **sequentially numbered** for ease of administration control and security.

Radio Transmitter for motorists

TEL433

TEL8G

- TEL433 and TEL8G radio transmitters are each **engraved with a unique 10 digit ID number**.
- The first 5no digits **identify the scheme**, the last 5no digits **identify the user**.
- They are also **sequentially numbered** for ease of administration control and security.

This is exactly the same numbering ID principle – copied from the mechanical key manufacturers – as used for the highest security level of mechanical keys available on the market.

It is the only ID numbering methodology that completely guarantees 100% accurate future-proof fully traceable control of every proximity key and radio transmitter.
