RESIDENT IPGUARD APP REMEDIAL REPORTING FORM

BATI CONNECT CLOUD
24/7/365
www.baticonnect.com

Dear Resident,

You have advised us of a fault.

Quick tips to self-fix !

1. Reboot (power down then turn back on) your Smart phone (device).
2. Delete (un-install) then re-install the IPGUARD App.
3. Check if there is mobile network or Wi-Fi available (if not please contact your service provider).
4. App permissions, please make sure: Notifications enabled; Mobile data enabled; Audio/Visual enabled.
5. Try making the default text size smaller (using large text can sometimes hide some of the App buttons). Please refer to your Smart phone manual.
6. Make sure you have set English as the default App language.

Office WiFi

Home WiFi

Any WiFi

LIVE VIDEO OF VISITOR

IPGUARD® users receive **LIVE VIDEO** calls from their visitors through WiFi every time their Smart Phone / iPad / tablet jumps onto WiFi.

At all other times, the **LIVE VIDEO** comes through via the 3G/4G mobile signal. If the 3G/4G signal is too weak for video, IPGUARD® will make an audio call instead – if your visitor is genuine, press the 5 button* to open the door.

* Subject to the button 5 opening feature having been authorised by the management company.

We need to locate you on the BATICONNECT CLOUD portal.
